

Table 6. Remedial Measures for Erosion Control

| | |
|----------|--|
| CLASS 1: | No action necessary. |
| CLASS 2: | Monitor to see if any further deterioration and action is required. |
| CLASS 3: | Any rills or gullies in excess of 8 square inches in cross sectional area and more than 10 linear feet located on finished slopes shall be arrested using straw mulch or the equivalent. |
| CLASS 4: | Replant and cover with straw mulch and install silt fences. If necessary, regrade and compact with equipment. |
| CLASS 5: | Replant and cover with straw mulch and install silt fences. If necessary, regrade and compact with equipment. |

3.11 Process Fines

Processing activities at the Rock Plant will generate some process fines that are not suitable for sale as aggregate products. These fines will be transported to the CMSA and the North Quarry for permanent storage. Alternatively, process fines may be
